

Straplock (8.5") - (F7000/F7115)

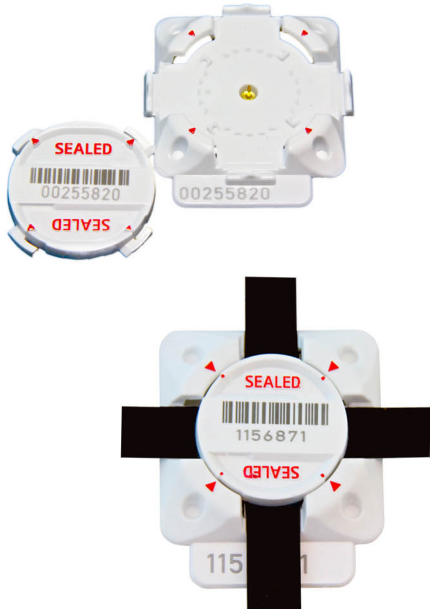

Applications

- Trucks
- Trailer Doors

- Cargo
- Bulk Tankers

- Railroad Cars
- Pipelines

The Straplock seal is specially designed to seal PP strapping on pallets and boxes. It is used in industries such as transport, retail, pharmaceuticals, and cash in transit. This seal is the ideal solution for protecting high value goods; rendering strapping tamper-evident. Additionally, serial numbering and optional barcoding enables easy recording of the seal numbers.

Company name / logo provide clear identification. There are also visible marks on the base and top section which serve as check points to verify the seal is locked securely. The F7000 fits for straps 6-12mm and the F7115 for straps 12-19mm. Finally, to close the seal, there is a manual and fully portable electric locking tool available.

Material	Polystyrene (PS)	
Sizes	F7115 (12-19mm width)	F7000 (6-12mm width)
